Regional Information Report<sup>1</sup> No. 4K93-31

Alaska Department of Fish and Game  
Division of Commercial Fisheries  
211 Mission Road  
Kodiak, Alaska 99615

December 1993

---

<sup>1</sup>The Regional Information Report Series was established in 1987 to provide an information access system for all unpublished division reports. These reports frequently serve diverse ad hoc informational purposes or archive basic uninterpreted data. To accommodate timely reporting of recently collected information, reports in this series undergo only limited internal review and may contain preliminary data; this information may be subsequently finalized and published in the formal literature. Consequently, these reports should not be cited without prior approval of the author or the Division of Commercial Fisheries.

## **AKNOWLEDGEMENTS**

Sincere gratitude is extended to all of the many seasonal weir camp employees throughout the past ten years who have made these numbers a reality. The time they spent enduring bugs, slimy dead fish, bears, and some long hours as well as time spent away from family, friends, a hot shower, running water, electricity, and certain foods are much appreciated. Thanks also to the hard working Finfish Management staff in the office coordinating and supporting this effort.

## INTRODUCTION

This report contains the salmon weir escapement enumerations for the Kodiak Management Area in 1993 and compares these counts with those of the past nine years. The Alaska Department of Fish and Game, (ADF&G), utilizes escapement data collected at weirs on Kodiak, Afognak, and Shuyak Islands to manage commercial, sport and subsistence fisheries. The ADF&G Division of Commercial Fisheries and Development operate the majority of these weirs. Alaska State Sport Fish Division and Alaska State Parks operate several weirs, and the Uganik River weir was operated by the U.S. Fish and Wildlife Service.

From 1984-1993 the number of weired systems has fluctuated with fisheries management needs or available funding. Additionally, new weirs have been installed over the past ten years to address specific management concerns, such as the Buskin River which receives subsistence, sport and commercial use. 14 weirs were operated in 1993 (Table 1).

Fish weirs are man-made structures with the primary function of allowing accurate total enumeration of adult salmon during their upstream spawning migration from saltwater to freshwater. This escapement information provides the basis for inseason management actions which regulate all user groups (commercial, sport and subsistence) harvesting of salmon. All five species of Pacific salmon along with steelhead trout and Dolly Varden are enumerated.

Operation of these weirs begins in mid-May to early-June until late-August to late-September depending upon the nature of salmon populations in a particular system.

Weirs operated between 1984 and 1993 are as follows:

**KARLUK WEIR** - Approximately 320' long, located about 1/8 mile upstream from confluence of Karluk River and Karluk Lagoon on the southwest side of Kodiak Island. First constructed in 1924; a two to four person camp. Operational from mid-May to late September. Escapements for 1993 can be seen in Table 2 and escapement by species in Tables 3-9 for the years 1984-1993.

**AYAKULIK WEIR** - Approximately 190' long, located about 1/8 mile upstream from confluence of Ayakulik River and Shelikof Strait on the southwest side of Kodiak Island. First constructed in 1929; a two to three person camp. Operational from late-May to early-September. Escapements for 1993 can be seen in Table 10 and escapement by species in Tables 11-17 for the years 1984-1993.

**DOG SALMON WEIR** - Consists of three weirs their lengths being 117', 125' and 25' on the three forks of Dog Salmon River which drains from the Fraser Lake system on the southend of Kodiak Island. First constructed in 1984; a two person camp. Operational from early-June to early-September. Escapements for 1993 can be seen in Table 18 and escapement by species in Tables 19-25 for the years 1984-1993.

**FRAZER LAKE** - Consists of a series of "fish ladders" which allow salmon to ascend a 30' falls, near the outlet of Fraser Lake on the southend of Kodiak Island. Counts are made at the outlet of the fishpass. Constructed in 1962 to accommodate a sockeye salmon stock introduced in 1951; a two person camp. Operational from mid-May to mid-August. Escapements for 1993 can be seen in Table 26 and escapement by species in Tables 27-30 for the years 1984-1993.

**UPPER STATION WEIR** - Approximately 80' long, located 60 yards below the outlet of lower Upper Station Lake on the southend of Kodiak Island. Moved to the outlet of the Upper Station Lagoon in 1993. First constructed in 1929; a two person camp. Operational from late-May to mid-September. Escapements for 1993 can be seen in Table 31 and escapement by species in Tables 32-37 for the years 1984-1993.

**AKALURA WEIR** - Approximately 60' long, located about 1/8 mile upstream from confluence of Akalura Creek and Akalura Lagoon on the southend of Kodiak Island. First constructed in 1923; a one to two person camp. Operational from late-May to late-September. Escapements for 1993 can be seen in Table 38 and escapement by species in Tables 39-45 for the years 1986-1993.

**SALTHERY WEIR** - Approximately 120' long, located about 1/4 mile below the outlet of Saltery Lake on the northeast side of Kodiak Island. First constructed in 1985; a one person camp. Operational from early-June to mid-September. Escapements for 1993 can be seen in Table 46 and escapement by species in Tables 47-53 for the years 1985-1993.

**BUSKIN WEIR** - Approximately 100' long, located about 1 mile above confluence of Buskin River and Chiniak Bay near the town of Kodiak. First constructed in 1985; a two person camp. Operational from late-April to early-October. Escapements for 1993 can be seen in Table 54 and escapement by species in Tables 55-61 for the years 1985-1993.

**LITNIK WEIR** - Approximately 120' long, located about 30 yards above the confluence of Litnik River and Litnik Lagoon on the southend of Afognak Island. First constructed in 1978; a two person camp. Operational from late-May to mid-September. Escapements for 1993 can be seen in Table 62 and escapement by species in Tables 63-69 for the years 1984-1993.

**PAULS BAY WEIR** - Approximately 20' long, located at the confluence of Paul's Creek and Perenosa Bay on the northend of Afognak Island. First constructed in 1984; a two person camp. Operational from early-June to mid-September. Escapements for 1993 can be seen in Table 70 and escapement by species in Tables 71-75 for the years 1984-1993.

**THORSHEIM WEIR** - Approximately 30' long, located about eighty yards above the confluence of Thorsheim Creek and Thorsheim Lagoon in Perenosa Bay on the NW side of Afognak Island. First constructed in 1986; a one man camp. Operational primarily from early-June to Mid-July. Escapement by species can be seen in Tables 76-79 for the years 1986-1989.

**PERENOSA WEIR** - Approximately 60' long, located below the fish pass on Portage Creek in Discoverer Bay on the northend of Afognak Island. First constructed in 1987; a two person camp (same people oversee Paul's Bay weir). Operational primarily from early-August to mid-September. Escapements for 1993 can be seen in Table 80 and escapement by species in Tables 81-85 for the years 1987-1993.

**UGANIK WEIR** - Approximately 220' long, located 1/4 mile upstream from confluence of Uganik River and East Arm Uganik Bay on the northwest end of Kodiak Island. First constructed in 1990, a three person camp, and floating weir design. Operational early-June to early-October. Escapement by species can be seen in Tables 86-92 for the years 1990-1992.

**MALINA CREEK WEIR** - Approximately 30' long, located near the outlet of Lower Malina Lake on the southwest end of Afognak Island. First constructed in 1993; a two person camp. Operational from early-June to mid-August. Escapements for 1993 can be seen in Table 93 and escapement by species in Tables 94-98 for 1992 and 1993.

**WATERFALL CREEK** - A series of waterfalls is spanned by "fish ladders" allowing passage of salmon to Waterfall Creek on the northend of Afognak Island. The "fish ladders" were constructed in the early 1980's and are operational late-July to early September. Escapement by species can be seen in Tables 99-104.

**BEAR CREEK WEIR** - Approximately 25' long, located near the head of Carry Inlet on the northend Shuyak Island. First constructed in 1986; a two person operation (same people oversee other Shuyak Island weirs). Operational from early-August to mid-September. Escapement counts for 1993 can be seen in Table 105 and escapement by species in Tables 106-108 for the years 1992 and 1993.

**BIG BAY WEIR** - Approximately 30' long, located at the head of Big Bay on the westside of Shuyak Island. First constructed in 1986; a two person camp. Operational; from early-August to mid-September. Escapement counts for 1993 can be seen in Table 109 and escapement by species in Tables 110-112 for the years 1992 and 1993.

Table 1. Escapement summary for systems with fish weirs in the Kodiak Management Area, 1993.

Weir Locations	Dates		Salmon Species Enumerated					Total
	Installed	Removed	Sockeye	Chinook	Pink	Coho	Chum	
1. Karluk	5/24	9/29	657,455	13,944	101,672	19,362	142	792,575

The Alaska Department of Fish and Game administers all programs and activities free from discrimination based on race, color, national origin, age, sex, religion, marital status, pregnancy, parenthood, or disability. The department administers all programs and activities in compliance with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, and Title IX of the Education Amendments of 1972.

If you believe you have been discriminated against in any program, activity, or facility, or if you desire further information please write to ADF&G, P.O. Box 25526, Juneau, AK 99802-5526; U.S. Fish and Wildlife Service, 4040 N. Fairfax Drive, Suite 300 Webb, Arlington, VA 22203 or O.E.O., U.S. Department of the Interior, Washington DC 20240.

For information on alternative formats for this and other department publications, please contact the department ADA Coordinator at (voice) 907-465-6077, (TDD) 907-465-3646, or (FAX) 907-465-6078.
